

# MAKE YOUR MINNOW MAGIC LAST!

To make your flowers make you smile for longer, follow these easy rules:

- \* Please make sure they don't go thirsty and give your arrangements a top up of water once a day.
- \* Make sure they stay strong and don't wilt, by not leaving your arrangement near any direct heating or cooling.
- \* Sometimes your flowers can make a mess, so if you have lillies, simply remove the stamens as soon as they become visible.
- \* If you have a big beautiful bunch please then give the end of the stems a 2cm angled chop every 2-3 days.
- \* And remember, if you have tropical orchids, that they feed from their petals. So don't just water them, but spray their petals with a spritzer also!

If you follow these simple steps,  
then your flowers will stay fresh for longer and continue to be..  
more than flowers .. impressions.
